

Contents

Introduction	Section 1
What's In It For You	1-1
What's New.....	1-2
Getting Started	1-2
Single-User Installation.....	1-3
Network Installation.....	1-6
Running the Program	1-9
How to Get Support	1-9
One Factor Tutorial	Section 2
Introduction.....	2-1
Design the Experiment.....	2-1
Enter the Response Data	2-4
Analyze the Results.....	2-6
Modifying the Design Layout (Advanced Topic).....	2-12
Two-Level Factorial Tutorials	Section 3
Full Factorial.....	3-1
Introduction.....	3-1
Design the Experiment.....	3-1
Enter the Response Data	3-4
Analyze the Results.....	3-7
Fractional Factorial with Foldover (Advanced Topic)	3-22
Saturated Design Example	3-23
Complete Foldover Design	3-25
Investigation of Aliased Interactions	3-28
Single Factor Foldover Design	3-32
Conclusion	3-35
General Factorial Tutorials	Section 4
General Factorial Part One: Categorical	4-1
Introduction.....	4-1
Design the Experiment.....	4-2
Analyze the Results.....	4-3
Split Plot (Advanced Topic)	4-7
Design the Experiment.....	4-8
Analyze the Results.....	4-9
Nested Design (Advanced Topic).....	4-17

Design the Experiment	4-18
Analyze the Results	4-18

Taguchi Design Tutorial **Section 5**

Introduction	5-1
Case Study	5-3
Design the Experiment	5-4
Analyze the Results	5-8

Advanced Design Features **Section 6**

Custom Generators for Fractional Factorials	6-1
Adding Categorical Factors	6-5
Design Evaluation.....	6-6

Advanced Analysis Features **Section 7**

Adding Responses via Equation	7-1
Propagation of Error	7-2

Statistical Details: Design Selection **Section 8**

Standard Two-Level Factorials	8-1
Irregular Fractions	8-3
General Factorials.....	8-3
D-Optimal Factorial Designs.....	8-4
Plackett-Burman Designs	8-4
Taguchi Designs	8-5
Order of Experiments	8-5
Factor Coding	8-5
Design Editing	8-7
Power Calculations.....	8-8

Statistical Details: Analysis **Section 9**

Sequence of Analysis	9-1
Transformations.....	9-2
Model Fitting and Hierarchy	9-3
Missing Data or Botched Levels	9-3
Plotting Pure Error on Effect Plots.....	9-4
Least Significant Difference (LSD) Bars on Model Graphs	9-5

Program Tips **Section 10**

Help System.....	10-1
Context-Sensitive Program Help	10-2
Statistical Help on Reports	10-2
Interface.....	10-3
Fixed Pane versus Pop-Out View	10-4
User Preferences.....	10-5
Miscellaneous Features	10-8
Design Status	10-8

Factors Tool	10-8
Simulation Models	10-9
Neat Tricks	10-12
Two-Level Factorial Analyzed as a Split Plot	10-12

Appendix**Section 11**

Files	11-1
Changing Icons	11-2
Right-Click Menu Locations	11-2
Network Installation with Built-In Metering	11-3
References	11-5

Index**Section 12**
