DESIGN-EXPERT® VERSION 11 SOFTWARE NOW AVAILABLE

New Updates Provide More Configurability, Multigraph Views and Toolboxes

MINNEAPOLIS – July 30, 2018 – Stat-Ease, Inc., a leader in the field of design of experiments (DOE), today announced the release of Design-Expert® software, version 11 (DX11). It benefits engineers, scientists, statisticians, research and development teams, quality experts, and anyone who wishes to efficiently improve processes, innovation and design.

With a clean, fresh and modern look and interface, users will find DX11 more configurable with multiple windows available for viewing and arrangement at the click of a button. The new multigraph feature provides side-by-side and up-down views of diagnostic plots for easy comparison. DX11 also includes upgraded toolboxes, enhanced graphics, new design capabilities, and improved analysis. Also new in version 11 is the macOS platform in addition to Microsoft Windows.

"DX11 is designed for the non-statistician who needs to run DOE's only occasionally. The intuitive interface provides easy navigation to build and analyze designs, said Pat Whitcomb, Founder of Stat-Ease. "And it remains the only DOE software package that determines cause and effect relationships with maximum efficiency."

"I've always appreciated how Stat-Ease keeps design of experiments practices simple and effective to use and interpret," said Richard Williams, Six Sigma MBB and Consultant at Richard Scott Williams, LLC. "Design-Expert version 11 takes things still further down the road of simplicity and practicality. The new platform and layout makes the most relevant information appear at just the right time in the analysis, through the use of the Notebook option. I love the new look and feel. Clearly the total rebuild contained in version 11 sets the stage for future enhancements, while maintaining continuity with prior versions."

The latest version of Design-Expert is available now for $1,350.00 (single-user license), which includes 12 free months of annual support and maintenance. Annual network licenses are also available. For a complete list of DX11's features, visit:

About Stat-Ease
Based in Minneapolis, Stat-Ease was founded in 1982 and has become a leading provider of design of experiments (DOE) software, books, training, and consulting services. Using these statistical methods, scientists, engineers, statisticians, quality experts, and research and development teams can improve the quality of products, enhance processes, quickly solve manufacturing problems, and make breakthrough discoveries. Via multifactor testing techniques, DOE quickly leads users to the elusive sweet spot where all requirements are met at minimal cost.
